Rusha
Ayala

Ayala (2) ♀

27.10.2011

No sisters or brothers

CC: In the last 3 days – rush in the face. The father had E.B.V that started in the same way.

In the past she had rash after disease.

The mother feels that the immune system is weak, some times low fever. Her sleep is not good at the last nights.

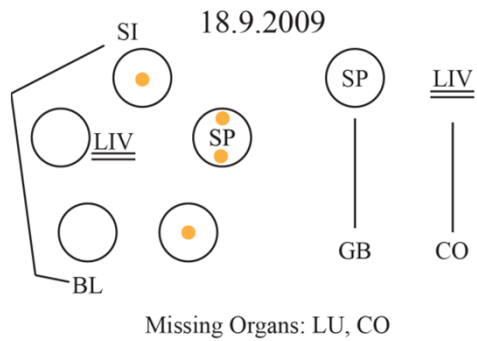

Pregnancy: The mother suffers from instability of the thyroid, in the beginning of the pregnancy it was hypo and later hyper.

Before that pregnancy the mother had 2 abortions in the first weeks – It was stress in the beginning of the pregnancy.

Birth: ✓.

Appetite: ✓.

Stools: They tried to wean her from the dippers, but it did not succeed – in the same time they moved to a new house and new daycare. In the beginning she was restraining, but when she was back to dippers she released.

Ayala (2) ♀

27.10.2011

No sisters or brothers

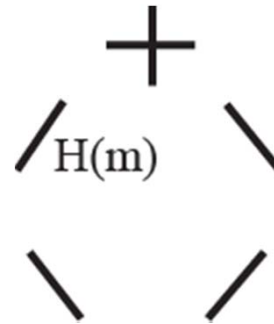

AB: She never got any drugs.

Vaccines: Only tetanus.

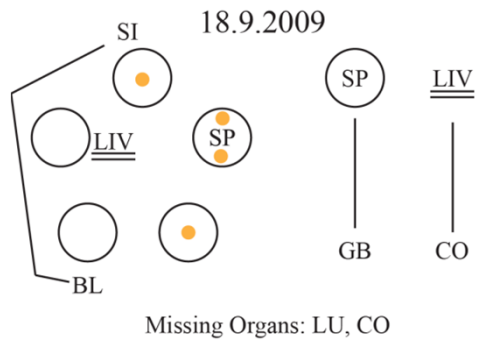

Mood: Very stubborn in this period.

Sleeping: Lately her sleep is very light, sometimes she suffers from nightmare. She is not sweat but the head, the back and the belly are feeling hot.

In the last days she is drooling.
